EDUCATION

Georgia Institute of Technology <i>B.S. in Computer Science (Intelligence and Information Internetworks)</i> • GPA: 3.41 • Coursework: Data Structures, Linear Algebra, Object-Oriented Programming, Objects and Design, and Computer Organization & Programming	Atlanta, GA May 2028
Raritan Valley Community College <i>A.S. in Computer Science and Mathematics</i> • GPA: 3.78 • Coursework: Assembly Language, Discrete Math, Multivariable Calculus, Statistics I & II, and Calculus I & II	Branchburg, NJ May 2023 - 2025

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, HTML, CSS, SQL
Frameworks / Libraries: React.js, React Native, Flask, FastAPI, NumPy, OpenCV, MoviePy, Streamlit, ML-Agents, Power BI
Tools & Platforms: Git, Docker, Linux, MongoDB, Nix, PyCharm, Google (ADK), Google Video Intelligence API, Microsoft Office

EXPERIENCE

Incoming Software Engineering Intern <i>New York Life Securities</i>	May 2026 – Present New York, NY
Software Engineering Intern <i>Photon Insights</i> • Designed and built modular backend data pipelines using Java and REST APIs to ingest, process, and classify financial datasets, reducing end-to-end data processing latency by ~35% across 3+ production workflows. • Integrated embedding-based search and NLP models into a scalable retrieval system, improving classification accuracy by 27% and enabling real-time trend detection across 10,000+ company and financial records.	Jul. 2024 – Aug. 2025 West Conshohocken, PA
Machine Learning Intern <i>Fimpler</i> • Developed and deployed a document parsing microservice using Python and Docker , enabling structured extraction of key fields from unstructured Indian bank loan documents across 2 distinct loan categories (business and housing). • Built NLP preprocessing pipelines integrated with LLMs via Ollama , improving data retrieval and field identification accuracy by approximately 25% while maintaining consistent performance across datasets exceeding 500+ documents.	May 2024 – Dec. 2024 North Brunswick, NJ
Research Intern <i>NJIT Bader Research Group, Department of Computer Science</i> • Researched and implemented MC1, MC2, and MC3 (Monte Carlo) algorithms for large-scale spatio-temporal data , integrating DBSCAN for cluster detection and developing methods to track objects across time and space. • Optimized algorithmic performance using advanced pruning techniques (MC2) and adaptive temporal adjustments (MC3) , improving computational efficiency and scalability.	Jun. 2024 – Aug. 2024 Newark, NJ

PROGRAMMING PROJECTS

Dental Scanner — Open Wide <i>Flask, Python, SQLite, HTML/CSS, Roboflow, Computer Vision</i> • Engineered a full-stack AI-driven web application using Flask and SQLite to automate dental image analysis and diagnostic reporting. • Applied transfer learning to a pre-trained computer vision model with a custom-annotated dataset built in Roboflow , improving dental feature detection and achieving 63.2% accuracy in real-time image interpretation.	Sep. 2025 – Present
Arena Vision <i>Google ADK, Gemini Vision, OpenCV, NumPy, Streamlit, MoviePy, REST APIs</i> • Engineered an autonomous sports highlight generator using Gemini Vision , Google ADK , and OpenCV , combining video, audio, and semantic analysis to detect and rank key gameplay events. • Developed a scalable video processing pipeline with Python , Streamlit , MoviePy , while integrating REST APIs , and Twitter's chunked media upload for automated editing and publishing.	Nov. 2025 – Present

LEADERSHIP AND COMMUNITY ENGAGEMENT

Apache Airavata (Airavata 2.0 / NASA) Software Engineer <i>Python, Java, Distributed Systems, AI/ML</i> • Built offline visualization tooling for protein model interpretability (NSF/NASA-funded project), implementing data readers and selective loading across 12–48 model layers and 64–256 attention heads , reducing trace load times by 40–70% . • Prototyped lightweight web/notebook-based interfaces to visualize 100+ inference traces (GB-scale datasets) , integrating protein structures with activations and attention maps to accelerate debugging, structural analysis, and model behavior understanding.	Jan. 2026 – Present
Student Organizations <i>Georgia Institute of Technology</i> • HyTech Racing, Big Data Big Impact, Data Science Club	Aug. 2025 – Present
